

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

# PREVALENCE OF DISEASE.

*No health department, State or local, can effectively prevent or control disease without knowledge of when, where, and under what conditions cases are occurring.*

## IN CERTAIN STATES AND CITIES.

### RECIPROCAL NOTIFICATION.

#### Minnesota.

*Cases of communicable diseases referred during July, 1915, to other State or Provincial health departments by collaborating epidemiologist Bracken of the Minnesota State board of health.*

Disease and locality of notification.	Referred to health authority of—	Why referred.
<b>Smallpox:</b>		
Minneapolis, Hennepin County.....	Elkton, Brookings County, S. D.	Left Elkton, S. D., July 4. Chicken-pox prevalent there. Eruption present July 23 at Minneapolis.
Do.....	Seattle, King County, Wash., also United States Public Health Service.	Taken ill on Great Northern tourist car en route from Seattle, Wash.
<b>Tuberculosis:</b>		
Pokegama Sanatorium, Pine County.	Decorah, Winneshiek County, Iowa.	Moderately advanced case. Left sanatorium for home in Iowa.
Mayo Clinic, Rochester, Olmsted County.	Creston, Union County, Iowa. Waucoma, Fayette County, Iowa. Jesup, Buchanan County, Iowa. Des Moines, Polk County, Iowa. Osterdock, Clayton County, Iowa. Hampton, Franklin County, Iowa. Mallard, Palo Alto County, Iowa.	3 actively advanced. 2 moderately advanced. 2 quiescent cases. Left Mayo clinic for homes in Iowa. Do. Do. Do.
Pokegama Sanatorium, Pine County.	Manistique, Schoolcraft County, Mich.	Advanced case. Left for home in Michigan
Nopeming Sanatorium, St. Louis County.	Saginaw, Saginaw County, Mich.	Taking treatment at Nopeming Sanatorium.
Pokegama Sanatorium, Pine County	Tunbridge, Pierce County, N. Dak.	Moderately advanced case. Left for home in North Dakota.
Mayo Clinic, Rochester, Olmsted County.	Marmon, Williams County, N. Dak. Hope, Steele County, N. Dak. Cincinnati, Hamilton County, Ohio. Watertown, Codington County, S. Dak. Elk Point, Union County, S. Dak. Maiden Rock, Pierce County, Wis. Grand Rapids, Wood County, Wis. Oconto, Oconto County, Wis.. Wyocena, Columbia County, Wis. Marengo, Ashland County, Wis.	Admitted to Pokegama for treatment June 14. Admitted to Pokegama June 22. Closed quiescent case. Left for home in Ohio. Open case. Left for home in South Dakota. Quiescent case. Left for home in South Dakota. Closed quiescent case. Left for home in Wisconsin. Left for home in Wisconsin. Do. Do. Do.
City and County Sanatorium, St. Paul, Ramsey County.	Stevens Point, Portage County, Wis.	Active case. Left for home in Wisconsin.
Solem Township, Douglas County...	Herbert, Saskatchewan, Canada.	Patient died in Solem Township a few days after arrival from Saskatchewan.
Mayo Clinic, Rochester, Olmsted County.	Yellow Grass, Saskatchewan, Canada.	Closed, quiescent case. Left for home in Saskatchewan.
Do.....	Kathrintal, Saskatchewan, Canada.	Active, advanced case. Left for home in Saskatchewan.
Do.....	Winnipeg, Manitoba, Canada..	Active, advanced case. Left for home in Winnipeg.

During the week ended August 7, 1915, cases of rabies were notified in cities as follows: Medford, Mass., 1 case, 1 death; New Orleans, La., 1 death.

**ROCKY MOUNTAIN SPOTTED FEVER.****Summary—Northwestern States—Jan. 1 to Aug. 14, 1915.**

August 14, 1915, Surg. L. D. Fricks forwarded the following report of the prevalence of Rocky Mountain spotted fever since January 1, 1915, in so far as he was able to obtain the information through State health authorities.

	Cases.	Deaths.		Cases.	Deaths.
California.....	2	.....	Oregon.....	46	4
Colorado.....	14	1	South Dakota.....	2	.....
Idaho.....	360	10	Utah.....	31	3
Montana.....	34	7	Washington.....	6	.....
Nevada.....	8	3	Wyoming.....	59	8

The two California cases were from Lassen County. This is the first report of cases which has been collected from Colorado, although one or two physicians in the State have reported an occasional case of the disease.

The case reported from Cascade County, Mont., was contracted in Idaho. Twenty-two of the Montana cases were from territory previously uninfected, and undoubtedly represent an extension of the disease into the southeastern part of the State.

It is hardly probable that the mortality rate in Nevada and Utah is any higher than it is in Idaho. Figured on this basis it would give approximately 100 cases for each of these States.

The two cases from South Dakota, reported by Dr. J. L. Chassell, Belle Fourche, are the first ever reported from this State. Dr. Chassell also reported five cases from Wyoming and one from Montana, treated by him. This probably represents a part of the same extension of the disease in a northeasterly direction from Wyoming, as previously reported by me from southeastern Montana.

This is the first year that cases have been reported from Wyoming as they occurred.

Three of the cases reported from the Warm Springs Indian Reservation, Oregon, represent an extension of the disease to the northwest in that State.

#### SCARLET FEVER.

See Diphtheria, measles, scarlet fever, and tuberculosis, page 2577.

#### SMALLPOX.

##### Kansas.

Collaborating Epidemiologist Crumline reported that during the week ended August 14, 1915, cases of smallpox were notified in counties of Kansas as follows: Atchison, 2; Jefferson, 1; Marshall, 6; Osage, 1; Sedgwick, 1.

##### Minnesota.

Collaborating Epidemiologist Bracken reported by telegraph that during the week ended August 21, 1915, several new foci of smallpox infection were reported in Minnesota, cases of the disease having been notified as follows: Faribault County, Blue Earth City Town-
